

# Craft: Campfire

This campfire will help set the scene for our stories this semester. At the start of rehearsal, we will all gather together around our own campfires.

## You will need:

### From your Story Kit:

- Brown construction paper
- Brown sharpie
- Glue stick
- Red, Yellow, and Orange tissue paper
- Clear plastic cup
- Your ABLE flashlight

### From Home

- Scissors

## Instructions:

### First, make your logs

1. Cut your brown construction paper lengthwise into 5 strips. Some can be wide and some can be narrow.

2. Use your brown sharpie to decorate your strips of paper to look like logs, You can add squiggly lines for bark. You can draw circles onto the ends to look like cut wood.

3. One stick at a time, build your wood pile. Place a strip of glue in the middle of a log and stack another log on top of it at an angle. Then put a strip of glue on the top log and add another stick to the pile. Keep going until you have stacked all of your logs!

## Next, make your flames

1. Fold your red tissue paper into thirds. Then fold it in half. You should have a square.

2. Trace your hand onto the tissue paper.

3. Cut out the shape that you traced. Because of how you folded the paper you should have 6 red tissue paper hands!

4. Repeat this with your yellow tissue paper.

5. Repeat this with your orange tissue paper.

6. Apply a lot of glue to the palm of one of your tissue paper hands. Glue it to the outside of your cup. Repeat this with a different color hand, slightly overlapping the first hand. Keep going all the way around the cup, alternating red, orange, and yellow so there are different colors all the way around the fire. Use about 9 or 10 hands.

7. Start another layer of hands a little bit lower than the first. Stick part of the palm to the bottom of the cup, and part to the side. Repeat this like before, alternating colors, overlapping hands, going all the way around the cup until you've used all of your hands.

## Finally, build your fire!

1. Apply a lot of glue to bottom of your cup. Press this down firmly onto the center of your wood pile. You may want to put your hand inside the cup to press down.

2. Let the glue dry.

3. Once the glue has set, turn on your flashlight and place it lit side up inside the cup. It should make your flames glow.

**Remember to bring your campfire with you to rehearsal!  
We will light our fires during warm up every week**
