Craft: Forest Backdrop

Hang this backdrop behind you when we film to help set the scene for our stories

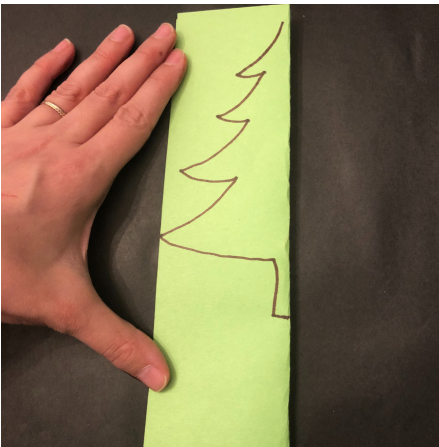

You will need:

From your story kit:

- Large black paper
- Different colored construction paper
- Star stickers
- Glue stick

From Home

- Scissors
- Tape or something to fix your backdrop to the wall
- Posterboard to mount your backdrop (optional)

Instructions:

1. Cut out different tree shapes using your construction paper. You can make some big trees and some little trees. An easy way to do this is to fold part of the paper over and trace half of the tree shape. Then cut it out and unfold.

2. Color in the trunks of your trees and add some branches

3. Glue the trees onto the black paper to show a nighttime forest.

4. Add some stars in the night sky with your stickers.

Let's try out our backdrops in Week #8 to see how they look. If you like it, you can use it for filming in weeks #9 and #10!
